

Product Finder List Page

Access the Product Finder list page by clicking **Product Finder** in the **COMPONENTS** menu in the top navigation bar.

The Product Finder list page contains the following information for each questionnaire in the account:

- The questionnaire's name, with the recommendation algorithm shown beneath
- The recommendation strategy associated with the questionnaire
- The number of active and inactive experiences using the questionnaire, or **UNUSED** if it's not associated with any experiences
- The date and time when the questionnaire was created

When your mouse pointer hovers anywhere within a table row, an additional options menu (...) appears at the far-right side of that row.

The options in that menu are as follows:

- **Create Web Experience:** This option takes you directly to the Product Finder panel of the WHAT settings of a new Web experience.
- **Edit Product Finder:** This option launches the Product Finder wizard
- **Delete Product Finder:** This option, which only appears if the questionnaire is not associated with any experiences, allows you to remove a questionnaire from the account.

To delete multiple questionnaires, click the checkbox at the far-left side of the row for each one that you want to delete. After you select which ones you want to delete, click the trash can icon.
