

Travel Targets

Travel targets are only available to clients using the [Monetate Travel API](#). Contact your dedicated Customer Success Manager (CSM) for more information.

Targets associated with the Travel segment are customizable but work somewhat differently for the cruise, flight, and hotel options. For each target, all the criteria and options that you can configure are treated as "and" statements. Visitors to your site qualify for an experience only if they satisfy all the individual elements defined in the travel target.

Cruise

There are three different cruise-specific targeting options: **Cruise Booked**, **Cruise Searched**, and **Cruise Viewed**. For individual cruise target definitions, see [Travel Targets](#) in [Types of WHO Targets](#).

Destination

This field allows you to define the travel destination considered for the target. Multiple destinations are treated as "or" statements. This information is specific to the destinations that were defined during the integration process.
